Bali, Indonesia

Software Engineer with production experience across advertising analytics, edtech, and IoT platforms. Comfortable across the stack, designing backend systems, real-time data pipelines, and frontend interfaces. Built and shipped systems handling high-volume data and high-concurrency workloads. Proven track record in national software development competitions.

Work Experience

PT Entrefine Data Indonesia - Kota Tangerang, Banten

Jul 2026 - Current

Software Engineer

- Develop a full-stack advertising analytics platform integrating Meta Ads and TikTok Ads data using React, TypeScript, Hono, Cloudflare Workers, D1, Prefect, Python, and ClickHouse.
- Develop analytics features (spend, impressions, conversions, provider comparisons) across 4 report levels, enabling marketing teams to evaluate cross-platform ad performance without manual data reconciliation.
- Improve advertising data reliability through report validation, retry handling, and duplicate-data detection, validating 15 TikTok Ads daily groups with exact spend matches and running reconciliation on hourly, 14-day, and 35-day cycles.
- Manage Docker Compose infrastructure across 4 servers, deploying application and monitoring services while maintaining sub-44ms ClickHouse query latency across 24 monthly partitions.

PT XLSMART Telecom Sejahtera Tbk - South Jakarta, Jakarta

Feb 2026 - Jul 2026

Software Engineer

- Built and maintained backend systems integrating AI microservices via MQTT, RPC, and HTTP, with PostgreSQL and Python.
- Developed sync processes and background workers to handle real-world GPS data from 21,000+ field devices, transforming raw telemetry into productivity metrics.
- Engineered a real-time alert pipeline detecting productivity anomalies, propagating structured alarm payloads with configurable thresholds.
- Debugged data mismatches and sync inconsistencies across services, documented across 20+ API endpoints with Typescript and OpenAPI Specification.

PolisiMuda.com - Singaraja, Bali

Mar 2025 - Feb 2026

Software Engineer

- Developed and maintained 34+ RESTful, Stateless API endpoints for a scalable education and testing platform using Go Fiber, PostgreSQL, and PGX.
- Built a React admin dashboard and user-facing frontend with 28+ unique pages, utilizing cookies and local storage for seamless session and token management.
- Implemented a Live Test feature supporting 100+ concurrent users, including a real-time scoreboard, enhancing engagement and delivering instant performance feedback.
- Enabled bulk test creation via CSV uploads, decreasing admin setup time by 70%.

Education

Universitas Brawijaya - Kota Malang, East Java

Jul 2023 - Jan 2027

Undergraduate Computer Science, 3.95/4.00

Organizational Experience

Basic Computing Community - Kota Malang, East Java

Jan 2024 - Dec 2025

Lead Backend Engineer

- Designed and developed a 10+ topic backend curriculum covering Go, REST APIs, testing, logging, caching, and real-time systems, used in training sessions for 15+ members.
- Taught back-end fundamentals and Go programming to 10+ interns through an interactive workshop and live coding, improving backend literacy across the community.
- Led an internal backend project with a team of 3 developers, applying curriculum content in practice and simulating real-world software team workflows.

Skills, Achievements, & Other Experiences

- **Soft Skills:** Time Management, High Responsibility, Leadership, Problem Solving, Critical Thinking, Team Communication.
- **Hard Skills:** Programming Languages (Go, JavaScript, TypeScript, Java, PHP, Python), Frameworks (Gin, Fiber, Hono, Laravel, Springboot, React, Nextjs), Databases (MySQL, SQL Server, PostgreSQL, MariaDB, Redis, ClickHouse, Cloudflare D1), API Development (REST, GraphQL, gRPC, MQTT), DevOps (Docker, Github Actions, Cloudflare Workers, Prefect).
- **Achievement (2025):** 2nd Place in Application Development at MAGE 11 ITS.
- **Achievement (2025):** 2nd Place at Hackathon Technoday UNNES
- **Achievement (2025):** 1st Place in Software Development at CODE 5.0 AMCC.
- **Achievement (2025):** 1st Place in Android Programming Competition at I/O FEST.
- **Achievement (2025):** BCA Scholarship Awardee (Bakti BCA).
- **Achievement (2024):** Top 20 in Software Development at GEMASTIK XVII.
